

JUNG JI EUN

Artist's notes

Picture's colors is the visual sources.

Color for a writer is surely the most important medium to express and at the same time, it conveys essence of the work. One of the work's focus is color formation.

So it doesn't look become cloudy. Writer is dyeing with a limited dye. Healing abilities appeared in many different ways as you can see writer's picture which performs in the shape of simplified color.

Natural color is filled of strength and vitality of positive energy. These filled the canvas and configured in different meanings. Mostly the works showing cheerful and exiting with a splash of sense.

Looking at Color-Field and it appears to be heard by the depth of color.

A new experience begins when you are sharing with art. Sharing begins when you imagine that doesn't visible. My paintings are cherishing themselves. Picture is my healing work.

When art heals me then the audience magically can be healed too.
