Hollywood Movie Director

International Artist - PSY

International Artist - Zhou Xun

International Artist - Tang Wei

# "SOMETHING (ART) THAT WILL LAST FOR 1,000 YEARS."

- KIM IL TAE -

*Kim* Il Tae is a South Korean artist that rose to become the first and only artist who paints, sculpts, and etches pure gold on canvas instead of gold leaf or gold foil. These curated pieces of selected gold paintings are made with 24 karat gold, with 999 parts per thousand of gold in its purest form.

Since ancient civilizations, gold, a precious metal that is incorruptible and resistant to tarnishing has been exclusively used. Associating with divinity, purity, and prestige, its brilliance and permanence make it the best suited medium and conceptual idea for the artist Kim to portray Oriental philosophy.

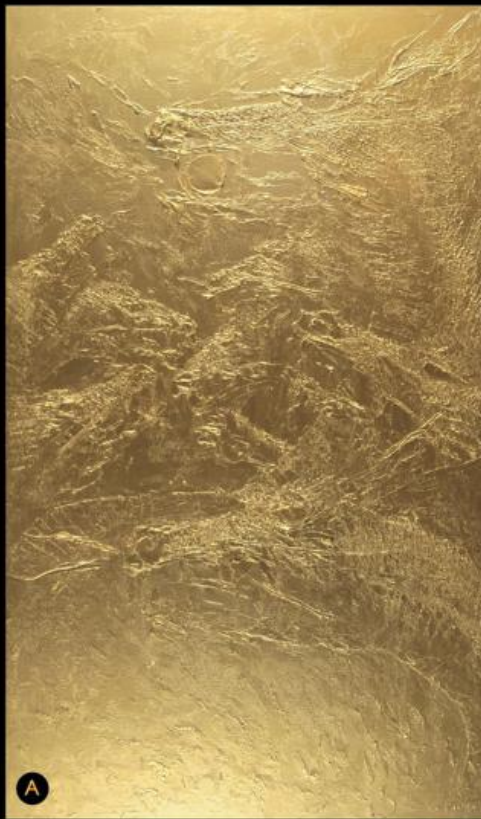

With 7 years of sacrificial efforts in his research, Kim Il Tae stood out to become the figure of an artist as alchemist, blending gold with natural oils from trees and a special glue of his own mixture. Mythical and real creatures such as dragons and horses, flowers and nature, and other Eastern figures and motifs have illuminated and surfaced under the artists' craftsmanship with layers of gold. All of which symbolizes luck, fortune, love, faith, strength and vitality, qualities valued dearly by Eastern culture.

Kim Il Tae's persistence led to another 5 years in succession of a profound technique in gold on ceramic painting, coming up also with the use of platinum and rose gold in his continuous groundbreaking practice. We witness timelessness here, in what seems to be incapable for us to grasp in our temporal existence - a glimpse of the imperishable.
