

Kasia is a Singapore based artist originally from Warsaw, Poland. When she was in her 20s she developed her interest in painting while watching her mother paint, although she didn't paint much at the time. A few years ago she discovered acrylics, her favourite medium and began her love for and devotion to painting.

In her portfolio you will find landscapes, nudes, portraits and pure abstracts, but it is the cityscapes that she is drawn to the most, especially places she used to live in, like Tokyo. Her originals and prints are across the world, from Europe to Japan, Australia and the U.S.
