

MOOKJI ART COLLABORATION

SEOUNG LEE

WWW.MOOKJIART.COM

I was born in a small village in Korea in 1965. I was always looking at the wide plain and I acquired an insight for broader things for my creativity. And it was how I established a passion for my art at the beginning. Since I was in elementary school, I always liked to become a cartoonist as I enjoyed cartoons very much. During my high school years, I participated in art competitions and it granted me an opportunity to enter an art college.

I graduated from the Art School of Hong-ik University Korea and I also achieved the Master's Degree from the same School. I majored in Woodcraft, Oriental painting and Furniture Design. Also, I completed the Doctor's Degree course at the Graduate School of Interior Architecture. I familiarized myself with a broad range of knowledges by learning about Oriental painting, Woodcraft, Furniture, and Interior Space. I gained a great confidence in various types of studies regarding Art area.

I have worked a lot, but now I'm more focused on recent art works.

My recent art works became the best part of my life as it became unique as I create images on the thread. However, it is always challenging to convey the feelings into images onto the complex form of delicate materials. The public view of my new form of art at the first exhibition exceedingly impressed people. My work involves a great mixed processes of engraving, oriental painting, oil painting, and crafts. The delicate mellow colors and the subjects of heritages from all different cultural backgrounds are the key to describe the expressions of new contemporary art. I also desire to express my feelings about profound oriental expressions using oil paints.
