## **Artist Statement**

The main idea to express through the works of an artist is aesthetic emotions that humans feel from natural objects such as flowers and trees which are encountered easily.

Through the works, the artist tries to embody the images of both visible and invisible worlds felt within hearts and to express the feelings of the moment that people see the flowers and trees.

To express the matiere, the mixture of sawdust, red clay and Hobun(Oyster shell white) etc. was adhered to Jangji(Korean paper) with glue. Several layers of colors were overlapped.
