

## Dr Phil Smith

I was born in Canada and have lived most of my life in the UK and Hong Kong. I came to visual art late in life after a career in science, writing and consultancy. By profession I am a psychologist. My paintings are not intentionally psychological – but my viewers may disagree. I strive to express my renditions of themes in science and nature. I paint what I dream, not what I see. This is my first exhibition, but it will not be my last. Just scratching the surface of the dreamscape.

I create dynamic abstract images using acrylics and other media, on paper, plastic and PVC, in sizes ranging between 12 x 18" (30 x 45 mm) and 20 x 30" (50 x 75 mm).
