

## **Wesley Denic**

### **Urban Eyes**

This work is inspired by street culture and influenced by the underground art community. These clay tablets are a continuation on a theme used hand crafted stencils to apply images of the urban environment onto to a ceramic canvas.

Cities may seem static but in fact are evolving at an almost geological pace for those of us who spend any significant amount of time in an urban metropolis. The street, roads and alleyways that wind between the cavernous architecture contain hidden wonders.

You can find artistic expression, commentary, places to eat and entertain that can be experienced on a more intimate scale if you choose to explore and seek them out.

All pieces are mid fired to 1100 C, hand rolled slabs, with a combination of slips, glazes, under glazes Works are sprayed with stenciled images. All wall works come with hooks/hangers.
